

Helping Families find Harmony

When families are in disagreement about the well-being of elder loved ones, it is often difficult to figure out who to turn to for guidance.

Mediators are impartial.
They do not take sides. Rather, the role of a mediator is to connect with each party with patience, understanding and compassion.

One goal of mediation is to help everyone reach accord.

Another goal is to help everyone learn ways to avoid or resolve future conflict.

Elder mediators integrate conflict management skills with knowledge about elder care issues, resources and solutions.

ELDEResolutions mediators have many years of experience facilitating conversations AND in elder care service delivery.

Often, people just try to avoid disagreements.

Conflicts will not go away. In fact, most situations get worse if left unattended!

The earlier problems are addressed – the easier to resolve!

Can you resolve the issues as a family unit without any help?

Many elder care professionals can help resolve disputes.

But, who is the right professional?

Most elder care professionals advocate on behalf of their client or prospective client. As an example, attorneys are appropriate to turn to when you need legal advocacy.

Mediators are the only profession to provide an impartial approach. Elder Mediators soothe tensions and include everyone in the process of reaching harmony.

Elder mediators help families reach harmony.

Mediators are experts in facilitating positive communication. And, elder mediators know all about elder services, how families work and what resources may be helpful.

A mediator sets ground rules and helps each person say what is important to them. As process experts, some of the mediators' special talents are the ability to assemble a group, identify common interests, and facilitate group decision-making, leading to agreements that everyone can live with.

Call us to learn how we can help your family.
